K.S.RANGASAMY COLLEGE OF TECHNOLOGY (Autonomous)
Tiruchengode - 637 215, Namakkal (Dt.)

Students' Internship On-Duty Request Form

Date: 28/02/2026

Name of the Student: Akshaya P.

Register No.: 73772214103 Roll. No.: 03

Degree & Branch: BE & CSE Semester: VIII

Year: I / II / III / IV Section: A / B / No Section

Name of the Company: Wspl Hosting Solution (Pvt) Private Limited

Company Address: 107/2, Sankar Mahi Road, Seethampalayam,
(In detail) Tiruchengode (Dt), Namakkal (Dt), Tamilnadu - 637 209.
02/03/2026 16/04/2026

Period of Internship: From: <<Date>> To: <<Date>> No. of Days: 45

Mode of Internship: Online / Offline / Hybrid

I request you to permit me to do the internship in the above cited company for the mentioned period.
I will follow the internship norms of the company and produce the completion certificate with report as per the procedure of the college.

Thanking you,

Yours truly,

R. A. J.

CALL LETTER & NON-DISCLOSURE AGREEMENT (NDA)

28 February 2026

To
Ms. Ackshaya R ,
9/A, Sowdambikaa street,
Thuraiyur, Trichy-621010.

Dear Ackshaya R ,

We are pleased to offer you an internship opportunity with **Wspl Hosting Solution OPC Private Limited**, starting from **02 March 2026** and concluding on **16 April 2026**. This letter outlines your internship period, company policies, NDA obligations, and related guidelines.

1. Internship Details

Internship Designation: Full stack Development

Internship Start Date: 02 March 2026

Internship End Date: 16 April 2026

Internship Duration: 45 Days

Employment Confirmation: Subject to satisfactory completion of the internship

2. Document Submission (Mandatory Originals & Copies)

Please submit the following documents on your joining date:

- 10th Marksheet (Copy)
- 12th Marksheet (Copy)
- Semester Marksheets (Copy)
- Aadhaar Card (Copy)
- PAN Card (Copy)
- Bank Passbook (Copy)

Originals are required only for verification and will be returned immediately.

Wspl Hosting Solution (OPC) Private Limited

107/2, Sankari Main Road, Seetharampalayam,

Contact: 9842573025 | 7339202005
Mail ID: support@wsplhosting.com | info@wsplhosting.com

3. Non-Disclosure Agreement (NDA)

As part of your Internship, you will have access to confidential, proprietary, and sensitive information related to Wspl Hosting Solution (OPC) Private Limited. To maintain the integrity and confidentiality of our business, you agree to the following:

- **Confidentiality:** You shall not disclose, reproduce, misuse, or share any confidential information obtained during or after the internship without prior written consent of the company.
- **Intellectual Property:** All work created during your Internship (designs, software, documents, etc.) shall remain the sole property of the company.
- **Return of Property:** Upon resignation or termination, all documents, IDs, hardware, and any other property belonging to the company must be returned.
- **Violation:** Any violation of this NDA will result in legal or disciplinary action, as deemed necessary by the company.

We look forward to a long and mutually beneficial association. Please sign and return a copy of this letter as your acceptance of the terms outlined.

Warm Regards,
Authorized Signatory

Full Stack Development Internship

18 April 2026

This is to hereby certify that Ackshaya R has successfully completed the Full Stack Development Internship at Wspl Hosting Solution OPC Private Limited. The said internship was undertaken for a period of 45 days, commencing on 02 March 2026 and concluding on 16 April 2026..

During the course of the internship, Ackshaya R demonstrated due diligence, professionalism, and compliance with assigned responsibilities. Practical exposure was obtained in both front-end and back-end development, with effective application of technical knowledge in accordance with organizational standards and project requirements.

Throughout the internship tenure, Ackshaya R adhered to company policies, displayed an understanding of operational workflows, and contributed responsibly to assigned tasks. The conduct and performance during the internship period were found to be satisfactory. This

certificate is issued upon request for all lawful and official purposes. Wspl Hosting Solution OPC Private Limited wishes continued success in future professional endeavors.

Authorized Signatories:

ACKNOWLEDGEMENT

I wish to express my sincere gratitude to our honorable Chairman **Mr. R. SRINIVASAN B.B.M., MISTE.**, for providing immense facilities at our institution.

I am very proud to render my thanks to our Principal **Dr. R. GOPALAKRISHNAN M.E., Ph.D.**, for extending the resources and the consistent encouragement given by him for the progress and completion of my project.

I proudly render my immense gratitude to the Head of the Department **Dr. B.G. GEETHA M.E., Ph.D.**, for her guidance and support in shaping the direction of this project. Your insightful feedback and expertise have been instrumental in refining our approach and methodology.

I am highly indebted to provide my heart full thanks to our internship coordinator **Mr. S. VADIVEL M.E.**, Assistant Professor for his valuable ideas, encouragement and supportive guidance throughout the project. Your constructive criticism and attention to detail have greatly contributed to the quality of this report.

I would also like to provide heartfelt thanks to my mentor, **Dr. R. CHITHRA B.E., M.E., Ph.D.**, for her valuable ideas, encouragement, and supportive guidance.

I would also like to extend my appreciation to all those who have directly or indirectly contributed to this project. Your contributions have been invaluable in making this endeavour a success.

ABSTRACT

This internship report documents the practical experience gained during my internship at **WSPL Hosting Solution (OPC) Private Limited from 02.03.2026 to 16.04.2026**, where I focused on developing an Event Management System as a full-stack web application. The primary objective of the internship was to design and implement a complete web-based platform for managing event bookings, customer interactions, and service coordination by integrating front-end and back-end technologies. During this period, I was actively involved in requirement analysis, system design, coding, testing, and deployment of the project. The application was developed with a responsive and user-friendly interface that allows users to explore event services, view galleries, and submit booking requests efficiently. On the back end, I implemented server-side logic, database connectivity, API integration, and booking management features to ensure secure data handling and smooth communication between the client and server. The system was designed to manage various event categories such as weddings, corporate events, birthday celebrations, and promotional programs. This internship significantly enhanced my understanding of the Software Development Life Cycle (SDLC), strengthened my problem-solving and debugging skills, and provided valuable hands-on experience in building scalable, dynamic, and real-time web applications in a professional environment.

CHAPTER 1

INTRODUCTION

Internships play an important role in bridging the gap between academic learning and industrial practice. They provide students with opportunities to apply theoretical knowledge in real-world situations and gain hands-on experience. My internship at WSPL Hosting Solution (OPC) Private Limited offered me an excellent opportunity to understand the workflow of software companies and learn practical development techniques.

During the internship period, our team was assigned to develop an Event Management System as a collaborative project. The system was designed to help users organize events such as weddings, birthdays, corporate meetings, and cultural programs through an online platform. It allows users to browse services, choose packages, make bookings, and contact the event management team.

This internship helped me gain experience in teamwork, front-end development, back-end programming, database handling, testing, and deployment. It also improved my technical, communication, and professional skills required for a successful career in the IT industry.

CHAPTER 2

COMPANY OVERVIEW

2.1 COMPANY NAME AND LOCATION

The name of the company is WSPL Hosting Solution (OPC) Private Limited. It is a reputed IT service company that provides innovative digital solutions for businesses and individuals. The company is headquartered at **107/2, Sankari Main Road, Seetharampalayam Post, Tiruchengode, Namakkal District, Tamil Nadu, India**. The company serves clients across different sectors with advanced technology services and customer-oriented solutions.

For more information, visit their website or contact them at [7339202005](tel:7339202005). For more details, visit <https://wsplhosting.com/>

2.2 BRIEF HISTORY

WSPL Hosting Solution (OPC) Private Limited was founded in 2015 with the objective of supporting startup businesses and organizations with professional website design services. Initially, the company focused mainly on website designing, and later in 2016, it expanded its operations by introducing web hosting services. Over the years, the company has grown into a full-service technology provider offering software development, app development, digital marketing, and business solutions. Through continuous innovation and quality service, the company has established itself as a fast-growing tech company in India.

2.3 PRODUCTS AND SERVICES OFFERED

WSPL Hosting Solution (OPC) Private Limited offers a wide range of products and services to meet the digital needs of modern businesses. These include:

- Website Development
- App Development
- Digital Marketing
- Domain Registration and Web Hosting
- Graphic Designing
- UI/UX Designing
- Custom CMS (Cloud Based)
- Software Development Solutions

- Technical Support and Maintenance
- Corporate Event Planning

The company focuses on delivering cost-effective, reliable, and scalable solutions for customers.

2.4 ROLE OF A FULL STACK DEVELOPMENT

A Full Stack Developer plays an important role in designing and developing complete web applications by handling both front-end and back-end development. Front-end development involves creating responsive and interactive user interfaces using HTML, CSS, JavaScript, and Bootstrap. Back-end development includes server-side programming, database management, authentication, APIs, and system integration using technologies such as Node.js, MySQL.

During my internship at WSPL Hosting Solution (OPC) Private Limited, I worked as a Full Stack Development Intern and independently developed an Event Management System project. My responsibilities included designing attractive web pages, creating booking forms, managing database connections, implementing event package modules, integrating contact features, testing functionalities, and deploying the final application.

CHAPTER 3

INTERNSHIP OBJECTIVES

3.1 PRACTICAL EXPOSURE TO INDUSTRY ENVIRONMENT

The primary objective of the internship at WSPL Hosting Solution (OPC) Private Limited was to gain practical exposure to a real-time professional work environment and understand how software projects are executed within an organization. This included learning workplace ethics, project planning, requirement analysis, coding standards, documentation practices, and meeting project deadlines. The internship provided an excellent opportunity to bridge the gap between academic learning and industrial expectations by working on a live project and understanding professional development methodologies used in the IT industry.

3.2 DEVELOPMENT OF FULL-STACK WEB APPLICATION

Another major objective of the internship was to design and develop a complete web-based application titled Event Management System by integrating both front-end and back-end technologies. This involved creating responsive and interactive web pages, implementing booking forms, managing event details, connecting databases, and ensuring smooth communication between different components of the application. The goal was to understand how modern web technologies work together to build a dynamic, efficient, and user-friendly platform that simplifies event planning and booking processes.

3.3 UNDERSTANDING SOFTWARE DEVELOPMENT LIFE CYCLE (SDLC)

The internship also aimed to provide a comprehensive understanding of the Software Development Life Cycle (SDLC), including requirement gathering, planning, system design, development, testing, deployment, and maintenance. Through practical involvement in each phase of the project, I learned how proper planning and systematic execution contribute to the successful completion of software applications. This objective helped me understand the importance of documentation, version control, testing methods, and continuous improvement in delivering reliable and quality software solutions.

3.4 ENHANCEMENT OF TECHNICAL SKILLS

A key objective of the internship was to enhance my technical skills in different areas of full-stack development such as front-end design, back-end programming, database connectivity, and form validation. The internship allowed me to strengthen my coding abilities, improve logical thinking, and gain hands-on experience in developing responsive and scalable web applications. It also helped me understand debugging techniques, error handling, database queries, and optimization methods used in real-time development environments.

3.5 IMPROVEMENT OF PROFESSIONAL AND PROBLEM-SOLVING SKILLS

In addition to technical development, the internship aimed to improve my professional skills such as communication, self-management, adaptability, and time management. Since the project was developed individually, it required taking responsibility for planning, execution, troubleshooting, and completing tasks within deadlines. This objective helped me build confidence, improve decision-making abilities, and develop a professional mindset necessary for a successful career in software development.

CHAPTER 4

PROJECTS OVERVIEW

4.1 DESCRIPTION:

The Event Management System is a web-based application developed to simplify the process of organizing and managing different types of events through an online platform. The system is designed for users who want to plan events such as weddings, birthday celebrations, corporate meetings, engagement functions, cultural programs, and other special occasions. Instead of manually visiting event organizers, users can access the platform, view available services, choose suitable packages, and submit booking requests easily.

The application provides a user-friendly interface with responsive design so that users can access it from desktops, laptops, tablets, and mobile devices. The system includes pages such as Home, About, Services, Gallery, Booking, and Contact. It allows users to explore event packages, check decoration themes, and communicate directly with the service provider.

The main purpose of developing this project was to digitalize event planning activities, reduce manual effort, improve customer convenience, and provide a modern solution for event booking and management.

4.2 DAILY TASKS AND RESPONSIBILITIES:

During the internship period, I was responsible for completing all project-related activities independently. My daily tasks and responsibilities included planning, designing, coding, testing, and improving the application based on project requirements.

The major tasks performed were:

- Understanding project requirements and preparing workflow
- Designing webpage layouts and user interfaces
- Creating responsive front-end pages using HTML and CSS
- Adding interactivity using JavaScript
- Developing booking forms and contact forms
- Connecting forms with database systems
- Managing event details and service information
- Testing the website on different devices and browsers
- Fixing coding errors and improving performance
- Updating features based on feedback and requirements

4.3 TOOLS AND TECHNOLOGIES USED:

Various modern tools and technologies were used for the successful development of the Event Management System. These technologies helped in designing the user interface, implementing business logic, managing databases, testing the application, and maintaining project files efficiently. Based on the project development environment, the following tools and technologies were used:

Front-End Technologies

- HTML5 – Used to create the basic structure of web pages and organize content effectively.
- CSS3 – Used for styling the website, designing layouts, colors, fonts, and improving visual appearance.
- JavaScript – Used to add dynamic functionality, client-side validation, and interactive user experience.
- React.js – Used for building reusable UI components and developing a fast, responsive single-page application.
- Tailwind CSS – Used for modern utility-based styling and responsive design implementation.

Back-End Technologies

- Node.js – Used as the server-side runtime environment for executing JavaScript code outside the browser.
- Express.js – Used to build APIs, manage routes, and handle server-side functionalities efficiently.

Database Technologies

- MySQL – Used as the relational database management system for storing user details, event bookings, contact requests, and other project data.
- SQL Schema – Used to define database tables, relationships, and data structure for the application.

Development Tools

- Visual Studio Code (VS Code) – Used as the primary source-code editor for writing, editing, and debugging project files.
- Vite – Used as a modern front-end build tool for faster development and optimized project performance.

- npm (Node Package Manager) – Used to install and manage project dependencies and packages.

Version Control and Configuration Tools

- Git & GitHub – Used for version control, project backup, and source code management.
- ESLint – Used to maintain coding standards and improve code quality by detecting errors.
- PostCSS – Used for processing CSS files and improving styling workflow.

Testing and Browser Tools

- Google Chrome – Used for testing website performance and responsiveness.
- Microsoft Edge – Used for cross-browser compatibility testing.

Project Structure Technologies

The project followed a structured full-stack architecture with separate frontend and backend folders, making the application modular, scalable, and easy to maintain.

These tools and technologies collectively helped in developing a professional, responsive, and user-friendly Event Management System with efficient performance and modern design standards.

4.4 SYSTEM MODULES AND CODE IMPLEMENTATION

The Event Management System was divided into different functional modules to improve maintainability and user experience. Each module was developed carefully with proper logic and testing.

Main Modules of the System:

1. Home Module

This module provides the introduction of the website, navigation menu, featured services, and highlights of the company.

2. About Module

This section gives information about the organization, mission, vision, and event planning experience.

3. Services Module

This module displays various event services such as wedding planning, birthday decoration, corporate events, stage decoration, catering, and photography.

4. Gallery Module

The gallery module shows images of previous events and decoration works to attract users.

5. Booking Module

This is the core module of the system where users can fill in booking details such as name, phone number, email, event type, date, and package preferences.

6. Contact Module

This module allows users to send inquiries and communicate with the organization.

Figure 1: Home Page

Figure 2: Services Page

Figure 3: Gallery Page

A screenshot of the 'Event Spark' website's booking page. The browser's address bar shows 'localhost:8000'. The header is identical to the gallery page. Below the header, the text 'BOOK NOW' is centered above the main title 'Book Your Event'. The page contains a booking form with the following fields: 'Full Name *' and 'Phone *' (text inputs), 'Email *' (text input), 'Event Type *' (a dropdown menu with 'Select Event Type' as the placeholder), and 'Event Date *' (a date picker showing '01-mm-yyyy'). Below these is a 'Message' text area and a 'Submit Booking' button with a right-pointing arrow.

4.5 COLLOBORATION WITH TEAM MEMBERS

The Event Management System was developed as a team project, where I collaborated with team members and primarily contributed as a Backend Developer. Our team worked together in all phases of the project development life cycle, including requirement analysis, planning, designing, coding, database creation, testing, debugging, and final deployment.

As a Backend Developer, my main responsibilities included designing the database structure, developing server-side logic, creating APIs, managing data flow between frontend and backend modules, and ensuring secure data storage. I worked closely with frontend team members to integrate user interfaces with backend services and maintain smooth system performance.

Collaborating with team members helped me improve communication, coordination, responsibility, and problem-solving skills. I learned how to manage tasks effectively, share ideas, solve technical challenges as a team, and complete project milestones within deadlines.

This collaborative development approach increased my confidence in working on real-time projects in a professional environment. It provided me with practical exposure to teamwork, backend development processes, and strengthened my technical as well as professional capabilities.

CHAPTER 5

LEARNING OUTCOMES

5.1 TECHNICAL SKILLS GAINED

a. FULL-STACK WEB DEVELOPMENT

- Designed and developed a complete Event Management System by integrating both front-end and back-end technologies.
- Implemented responsive and interactive user interfaces using HTML, CSS, JavaScript, React.js, and Tailwind CSS to provide a smooth user experience.
- Developed server-side logic using Node.js and Express.js to handle booking requests, contact forms, and event service management.
- Integrated front-end and back-end modules through APIs for seamless data communication and real-time processing.
- Built reusable components and optimized application structure for better maintainability and scalability.

b. DATABASE MANAGEMENT & INTEGRATION

- Designed database schemas to manage users, bookings, inquiries, event categories, and service details efficiently.
- Performed CRUD (Create, Read, Update, Delete) operations for dynamic data management.
- Established relationships between database tables to maintain consistency and data integrity.
- Managed booking details, customer information, and event records securely.
- Optimized database queries to improve overall system performance and response speed.

c. API DEVELOPMENT & SECURITY IMPLEMENTATION

- Developed and tested APIs for booking submissions, contact requests, and event data retrieval.
- Implemented form validation and secure request handling mechanisms.
- Applied error handling techniques to improve system stability and user experience.
- Ensured safe storage and processing of user data through secure coding practices.
- Improved application reliability by handling exceptions and invalid inputs properly.

d. VERSION CONTROL & DEPLOYMENT

- Used Git and GitHub for source code management and version control.
- Maintained structured project folders for frontend and backend modules.
- Managed package dependencies using npm.
- Assisted in deployment setup and monitored project performance after hosting.
- Maintained project documentation for future updates and maintenance.

5.2 SOFT SKILLS DEVELOPED

Apart from technical skills, the internship also helped me improve several soft skills that are essential in a professional environment. Since the project was handled individually, I developed strong time management skills by planning daily tasks and meeting deadlines.

I improved my communication skills through reporting progress, understanding project requirements, and presenting project ideas clearly. I also developed problem-solving skills by analyzing issues and finding suitable solutions during development. The internship enhanced my self-learning ability, patience, adaptability, and confidence, which are important qualities for a successful software developer.

5.3 INDUSTRY KNOWLEDGE ACQUIRED

The internship provided practical exposure to how software companies operate and manage projects professionally. I learned about the complete Software Development Life Cycle (SDLC) including requirement gathering, planning, designing, coding, testing, deployment, and maintenance.

I also understood the importance of coding standards, documentation, teamwork culture, meeting deadlines, and delivering quality software products to clients. Additionally, I gained knowledge about how companies use modern technologies, version control systems, hosting environments, and customer-focused development strategies to build successful software solutions.

5.4 PROFESSIONAL DEVELOPMENT

a. Problem-Solving & Critical Thinking

- Analyzed and resolved issues related to frontend-backend integration.
- Fixed bugs related to booking forms, routing, validation, and database queries.
- Improved analytical thinking by designing efficient workflows for users.

b. Adaptability & Continuous Learning

- Quickly adapted to new tools and frameworks used during development.
- Learned to research errors, troubleshoot problems, and implement solutions independently.
- Improved confidence in learning modern web technologies.

c. Confidence & Career Growth

- Gained confidence in handling complete real-time projects independently.
- Improved readiness to work on larger full-stack web applications in professional environments.
- Strengthened career interest in software development and modern web technologies.

CHAPTER 6

CHALLENGES FACED

6.1 COLLABORATING AND COORDINATING WITH TEAM MEMBERS

Challenge:

During the development of the Event Management System at WSPL Hosting Solution (OPC) Private Limited, coordinating tasks among team members was one of the major challenges. Since the project involved multiple modules such as UI design, frontend development, backend implementation, database creation, testing, and documentation, effective communication and proper task distribution were essential. Managing dependencies between different modules, ensuring timely completion of assigned tasks, and maintaining consistency in project quality required strong teamwork and coordination.

Solution:

To overcome these challenges, our team prepared a structured work plan and divided the project into smaller modules based on each member's responsibilities. Regular discussions were conducted to review progress, share updates, and resolve issues quickly. We coordinated closely to integrate frontend and backend modules smoothly, maintained proper documentation, and monitored deadlines effectively. This collaborative approach helped us complete the project successfully while improving our teamwork, communication, and project management skills.

6.2 DEBUGGING AND TESTING ISSUES

• Challenge:

During the development process, identifying and resolving technical issues was another significant challenge. Errors such as form validation problems, routing issues, database connection failures, API integration issues, responsive design inconsistencies, and unexpected code conflicts affected the smooth functioning of the application. Since the project was developed as a team, debugging required coordination between frontend and backend members to identify the exact source of problems. Ensuring stable performance and compatibility required patience and systematic analysis.

- **Solution:**

To solve these issues, our team followed a step-by-step debugging approach by testing each module separately and verifying integration points carefully. We used browser developer tools, console logs, and server error messages to identify problems quickly. Repeated testing was conducted on different browsers and devices to ensure responsiveness and compatibility. Database queries, APIs, and form validations were reviewed multiple times to improve accuracy and reliability. This experience strengthened our troubleshooting abilities and highlighted the importance of teamwork and thorough testing in software development.

CHAPTER 7

CONCLUSION

The internship at WSPL Hosting Solution (OPC) Private Limited was a highly valuable and enriching learning experience that provided me with practical exposure to real-time software development and professional work culture. During the internship period, I actively contributed to the development of the Event Management System as a team-based full-stack web application project, where I primarily worked as a Backend Developer. This project enabled me to apply my academic knowledge in a practical environment and understand how modern web applications are developed from initial planning to final deployment.

Through this internship, I gained strong technical knowledge in backend development using server-side frameworks, database management for storing and retrieving user and booking information efficiently, and API integration for smooth communication between frontend and backend modules. I also improved my understanding of the Software Development Life Cycle (SDLC), including requirement analysis, system design, coding, testing, debugging, deployment, and maintenance.

Working collaboratively with team members helped me develop important professional skills such as communication, teamwork, time management, problem-solving, and responsibility. Overcoming technical challenges during development increased my confidence and enhanced my ability to work effectively on real-time software projects in a team environment.

Overall, this internship was an important milestone in my career journey. It strengthened my interest in backend and full-stack web development and motivated me to continue learning advanced technologies. The knowledge and experience gained during this internship will be highly beneficial for my future career in the software industry.

EMPLOYER FEEDBACK FORM

K.S.RANGASAMY COLLEGE OF TECHNOLOGY, TIRUCHENGODE- 637 215

(An Autonomous Institution, Affiliated to Anna University, Chennai)

Student Intern Performance Review / Employer Assessment of Intern Form

We appreciate your contribution to the professional growth and development of our students. In order for us to best assess the experience, we request you to complete this form and return it to us at the end of the internship period. We believe that your comments will help the student to build his career.

Student Information

Intern's Name	Ackshaya.R	Department	CSE
Semester	VIII	Type: Paid/Unpaid	Unpaid
Period of Internship	From: 02/03/2026	To: 16/04/2026	45 days

Please rate the intern in each area using the following criteria and score:

Not Applicable-0; Not acceptable-1; Needs improvement-2; Meets Requirements-3; Above Average-4; Exceptional-5.

1. Adherence to Work Schedule

Meets attendance and punctuality expectations; completes assigned tasks in time; keeps commitments and takes responsibility for own actions.

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☐ Above Average |
| ☒ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

2. Team Player

Consistently demonstrates proactive nature takes independent action and calculated risks; knows when to seek prior approval.

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☒ Above Average |
| ☐ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

3. Communication Skills

Exhibits good listening and comprehension; Interacts well with others and resolves conflicts.

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☐ Above Average |
| ☒ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

4. Learning Curve

Competent in required job skills and knowledge; exhibits ability to learn and apply new skills; requires minimal supervision ability to apply creative solutions to problems.

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☐ Above Average |
| ☒ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

5. Decision Making

Accepts criticism and constructive feedback; applies skills appropriate for carrying tasks and solving problems; makes sound decisions.

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☒ Above Average |
| ☐ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

6. Responsibility and Reliability

Demonstrates accuracy and thoroughness; work reflects compliance to standards, commitment to excellence and attention to detail; strives to increase productivity.

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☐ Above Average |
| ☒ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

7. Employment Skills

Willingness to learn new skills which are job-specific or more general.

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☒ Above Average |
| ☐ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

8. Technical Competencies

Ability to apply learned skills to the internship work environment

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☒ Above Average |
| ☐ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

9. Critical Thinking and Problem Solving Skills

Demonstrates critical thinking and problem solving skills

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☐ Above Average |
| ☒ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

10. Ethics & Professionalism

Understand the ethical responsibility towards society and the principles of fairness while dealing with all stakeholders.

- | | | |
|---|--|---|
| ☐ Meets Requirements | ☐ Needs improvement | ☒ Above Average |
| ☐ Exceptional | ☐ Not Applicable | ☐ Not acceptable |

OVERALL EVALUATION:

Total Marks:

45
50

Please give in written form of assessment of the student's performance.

Is the student better prepared for the industry? What is the possibility of being hired as a permanent employee in your concern?

The student has good basic knowledge and shows potential for future employment.

What is your suggestion for improvement of the intern?

The intern should improve technical skills.

Employer Information:

Name and Signature of the Reviewer	MOHAMED DARVEST 
Designation & email	DIRECTOR admin@wsplhosting.com
Name of the Company	WSPL Hosting Solution Pvt Ltd
Address	Tiruchengode
Date of Evaluation	18/6/20.

WSPL HOSTING SOLUTION (OPC) PVT.LTD.,
107/2, Sankari Main Road,
Seetharampalayam (P.O.)
